### DETAILED ACTION

Claims 140-154 are pending.

This is a response to the the Board's decision issued on 03/11/2003 regarding Interference No. 104,491 and Applicant,s amendment filed on 4/6/2004.

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970);and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 140-154 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-19 of U.S. Patent No. 6,441,026( Bissery ). Although the conflicting claims are not identical, they are not patentably distinct from each other because the currently claimed cyclopropyl taxotere has been disclosed in Bissery patent which is useful to treat a variety of cancer diseases, note compound in column 4 of the patent. The composition of Bissery has also been taught in the current disclosure, note compound (I) in page 1 and pages 45-47 of the same. There is not a patentable distinctness between the current compound and the composition of Bissery since the composition is in use for medical practice and it comprises the compound( the major ingredient) and a pharmaceutical carrier(s). When the patent term of the composition is expired, the composition (and the compound as well) will no longer be protected and is in public domain. A patent for the compound can not be enforced

Art Unit: 1625

afterward since it is in conflict with the public interest. This also applies to the method of use since it is known and disclosed in the Bissery patent.

No claim is allowed.
